

GoldMine® Plus

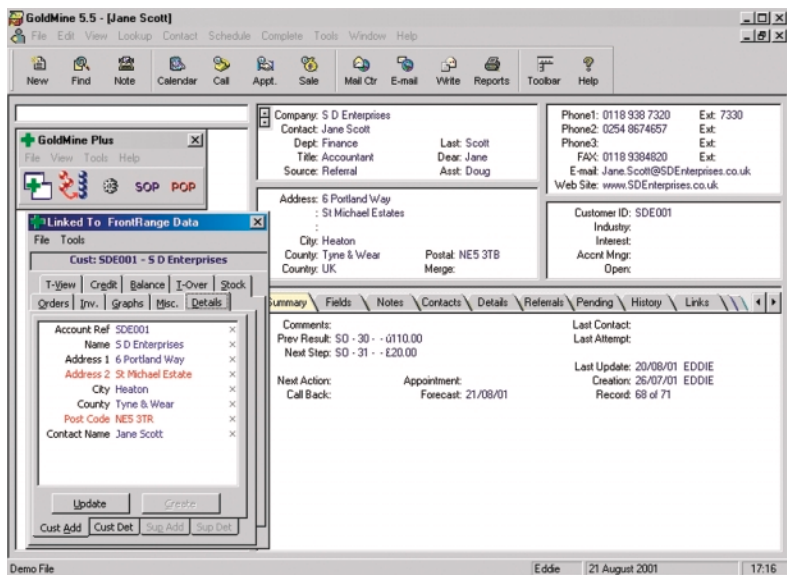

for Sage Line™ 50

GOLDMINE® PLUS FOR SAGE LINE 50® PROVIDES SEAMLESS FRONT AND BACK-OFFICE INTEGRATION BETWEEN GOLDMINE AND SAGE LINE 50.

GoldMine Plus for Sage Line 50 is an affordable solution that links the popular GoldMine customer management product to the Sage Line 50 accounting package. This solution allows users to process sales orders, check pricing, monitor credit limits, and access other important accounting functions all from within the familiar GoldMine interface — increasing efficiency, promoting information sharing, and providing a complete picture of customer activity.

Designed for businesses and people that do not want separate, unrelated systems to access customer, sales, accounting and operational data, GoldMine Plus for Sage Line 50 connects the front and back office to provide a single, unified record for all transactions that relate to a customer. GoldMine Plus allows a user to access account information without having to open and use Line 50, or implement a complex and expensive enterprise solution.

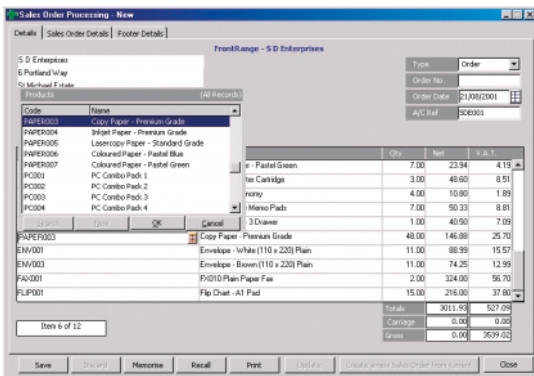

A real-time window shows the GoldMine contact's financial information from the accounting system

GOLDMINE® PLUS FOR SAGE LINE 50®

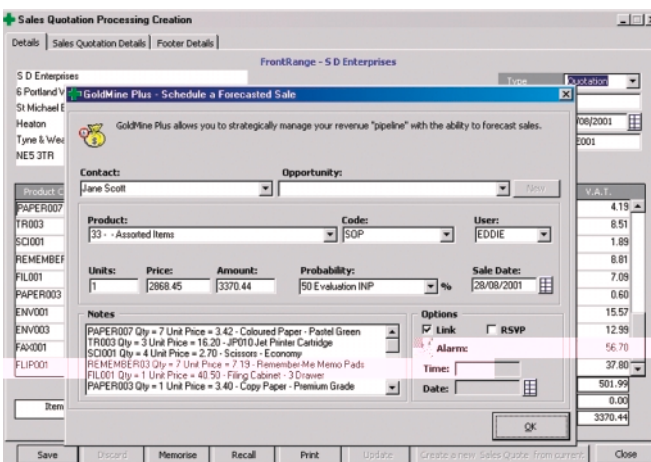

GOLDMINE PLUS FOR SAGE LINE 50 ALLOWS YOU TO:

- Maintain consistent contact data across the sales and accounting systems.
- View critical accounting data without giving sales users direct access to Line 50.
- Generate quotes and enter orders.
- Schedule Goldmine activities or Automated Processes™ based on information in Line 50.
- Store, view and update fields in GoldMine with data from Line 50.
- Give remote or mobile GoldMine users access to accounting information without connecting to, or requiring a license for, Line 50.

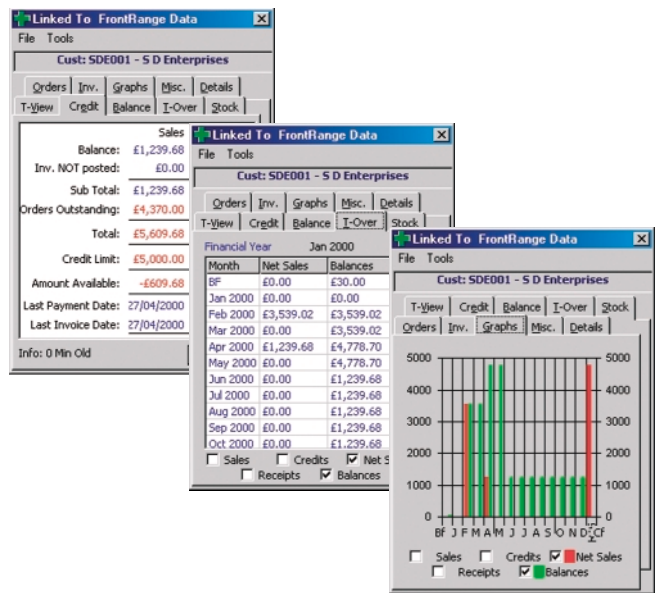

WITH SALES ORDERS, GOLDMINE PLUS FOR SAGE LINE 50 AUTOMATICALLY:

- Completes a forecasted sale in GoldMine and updates the history.
- Saves the order in Line 50.
- Provides an option to create one or multiple forecasted sales that can be accessed from the contact's Pending tab.

GOLDMINE/GOLDMINE SALES AND MARKETING USERS CAN VIEW:

- Invoices, with a drill-down capability to view specific invoices and the status.
- Credit information, including the amount currently available.
- Balances broken down by current and 30/60/90 day status.
- Turnovers, displaying all returns for the year.
- Sales orders, with a drill-down capability to view specific orders and the status.
